PROFILE

As a talented software developer with a passion for game development, I have a strong background in creating engaging and interactive user experiences. My experience includes working with **HTML, CSS, JavaScript**, and JavaScript frameworks like **React** and **Vue.js**. I have a strong understanding of game development, including physics and collision detection using frameworks like **Phaser**. I am always eager to learn new technologies to ensure my work is of the highest quality.

WORK EXPERIENCE

JavaScript Developer

Playin

APR 2022 - Present

- Playin is an Izmir based playable ad development company.
- Creating new game features that work well with the internal management system.
- Developed some playable ads such as **Words of Wonders (WoW), Crossword Jam: Fun Word Search, and Word Wars: Puzzle with Friends** using **Phaser** and **JavaScript**.
- Developed two other playable ads **Casino Slot Game** and **Video Game** with using **HTML**.
- At the moment, I am working on full version web game "**Galaxy Attack: Alien Shooter**" using **JavaScript** and **Phaser**.
